## NOGAS Newsletter Fall 2014

What a difference a day makes! The beginning of the fall season has seen extreme temperature changes ranging from the low 60's to the low 80's in only a 24-hr time period. This, coupled with the record snowfall and temperatures over the winter months and the record rainfall in July has, of course, impacted the landscape in many ways. Our crews have done a great job at sustaining these variant weather conditions and continue to keep busy with the routine seasonal maintenance responsibilities and preparations for the upcoming colder months.

As of October 1<sup>st</sup>, we are no longer operating under a weekly mowing schedule. This allows us to not only complete the routine maintenance, but recover from the past weather conditions, and adapt to current ones. We anticipate all pre-snow cleanups to be completed by November 30<sup>th</sup>, weather permitting. Upon completion, the crews will begin snow staking. Due to the harsh conditions of last winter, we may face a resulting shortage of rock salt. As of right now, rock salt prices have not changed. Although, should we experience difficulty obtaining the product due to similar conditions this coming winter, we will do our best to keep the resulting change in cost to a minimum. Should you have any concerns or questions regarding preparations for the upcoming snow season, please contact us as soon as possible to discuss.

As a reminder, many contracts are up for renewal this year. If you have not returned your signed contract, we humbly ask that you please forward it to us as soon as possible. Should you have any questions or need another copy, please contact us. We appreciate your cooperation in this matter, as this allows us to organize our client rosters, ensuring the superior service you can expect from Nogas.

In closing, we appreciate the fact that you choose to do business with us and thank you for your continued patronage. We look forward to the privilege of a successful relationship in the upcoming months.
