NOGAS Newsletter

Autumn 2013

We at Nogas hope you are enjoying the last days of summer and looking forward to the upcoming fall season. Our crews continue with routine seasonal maintenance responsibilities and preparations for the upcoming colder months. This summer has presented conditions that span the entire spectrum. As stated in previous communications, the early summer was one of the wettest on record presenting its own challenges. Following the 4th of July, drier conditions prevailed with August being one of the driest in recent history. These draught conditions resulted in areas of lawns with irreparable draught damage. These areas will need reseeding as early as September and October, in order to avoid freezing conditions and ensure optimal growth. Should you be aware of or have questions regarding damaged lawn areas, please contact Dave or Mike for information and estimates.

As a reminder, many contracts are up for renewal this year. If you have not returned your signed contract, we humbly ask that you please forward it to us as soon as possible. Should you have any questions or need another copy sent to you, please contact us. We appreciate your help as this allows us to organize our client rosters, ensuring the quality service you expect.

As always, we value your business and strive to provide the highest quality service available. Should you be pleased with our services, we ask that you refer us to other Associations as well. In addition, the cold weather season is fast approaching; we ask that you notify us of any necessary changes in your Snow Contract as well. In closing, we look forward to a continued successful relationship in the upcoming seasons.
