## JULY 2015 NEWSLETTER

The summer of 2015 has been very challenging with having the wettest June in Illinois history. It seems like July is on the same weather pattern. All crews are doing all they can do to keep up with our services. We greatly appreciate your patience with this unforeseen weather pattern. With all the rain & changing temperatures a lot of lawn are experiencing dollar spot/brown patch. We do provide a fungicide application that will help suppress it or help it from spreading, but we cannot offer a guarantee of its effectiveness that it will work. All major factors have to take place for it to be effective at all like rainfall, moisture, weather temperature etc. If you would like a price on this service that we provide please call our office.

Also, we are updating our contact phone number & emails. If you could take a moment & complete the form & mail, email or fax back to us, we can update that information for you.

Thank you

Dave Noga
