SUMMER 2013 NEWSLETTER

Dear Valued Client,

As we approach summer's midpoint, we would like to take this opportunity to update you on the current state of your property. The 2013 Spring/Early Summer season was one of the wettest on record presenting unique challenges for lawncare/maintenance. Yet, you can be confident that Nogas Landscaping has endured these erratic weather conditions while maintaining all properties with the quality you have come to expect.

More specifically, all first round trimming was completed by the first week in July. Trimming of evergreens will begin in July. All grub control as well as the second round fertilization will be completed by July 15th, weather permitting. Should you have any additional questions or concerns, please contact us so that we can address them as soon as possible. Furthermore, if you wish to schedule a fall walk-through, and have not done so, please schedule as soon as possible to discuss timelines for any fall plantings or other upcoming projects.

Sincerely,

NOGAS LANDSCAPING

Dave Noga
