# NEWSLETTER Summer 2014

Dear Valued Client,

As we approach the early end of summer, we at Nogas Landscaping wanted to make you aware of the current and future maintenance of your property. As you are probably aware, our summer has been characterized by strong, yet erratic weather conditions with unseasonably cool temperatures and much precipitation. The approximately 12-14" of rain since June 1<sup>st</sup>, has remedied some of the turf damage resulting from the drought conditions in 2012-2013. The large amount of rain also keeps our crews hard at work keeping up with the grass, bush trimming and weed control, while the turbulent weather contributes to challenging cleanups and trimming. Please be patient as our crews are working hard to keep with the weather with as little disruption to project schedules as possible. All seasonal fertilization was completed by July 15<sup>th</sup>, and weather permitting, the 2<sup>nd</sup> round of trimming will be completed by August 21<sup>st</sup>. Again, we appreciate your patience.

All contract renewals have been distributed, and we encourage you to contact us with any questions or concerns regarding contracts. In addition, we ask that you schedule your Fall Walk-Through as soon as possible, as our schedule fills up quickly. The walk-throughs are essential to maintaining an open dialogue and understanding of mutual property expectations. We appreciate your continued business and patience as we strive to provide the best quality maintenance services.
